Welcome to the Month of June

The 6th month of the year brings us *Summer, Father's Day, Flag Day, and the Summer Solstice.*

In the Georgian calendar, the calendar that most of the world uses, June is the sixth month. However, according to the early Roman calendar, June was actually the fourth month and had only 29 day. In 46B.C, Julius Caesar gave June 30 days instead of 29 when he reformed the Roman calendar. June was named after the Roman goddess Juno, who is the wife of Jupiter. However, others say that its name actually came from the Latin word juniors. It means the younger ones, which is opposed to majors or elders which May's name was originated from. In June, spring ends and summer begins in the Northern Hemisphere. During this time, all the flowers and plants are very beautiful. In the southern hemisphere, winter begins in June.
